BIPM 150
1 8 7 5 - 2 0 2 5

Metrology does not only exist in laboratories or scientific research. It actively takes part in every aspect of our lives. It breathes with us, it lives with us. Even if we are not aware of it, it is an inseparable part of our lives, one of its fundamental building blocks.

Modern metrology is still young at 150 years old!

Metrology exists in life. METROLOGY IS LIFE ITSELF!

Metrology is life itself!

Awareness of metrology can be raised through :

- Social media initiatives,
- Inclusion of lessons in schools from kindergarten to university according to student levels,
- Designing special education programs,
- Open day activities to be organized by metrology institutes,
- Festivals and celebrations
- Practical workshops
