

Intercomparison of ammonia reference gas generators & traceable data structures

Fritsche J., Federal Institute of Metrology, Switzerland
Mace T., Soutour C., Laboratoire national de métrologie et d'essais, France
Persijn S., de Boed J., National Metrology Institute VSL, The Netherlands
Högström R., VTT Technical Research Centre of Finland Ltd, Finland
Pogány A., Physikalisch-Technische Bundesanstalt (PTB), Germany

Background & Needs

Reference gas generators

Three different principles

Acknowledgements

The project 21GRD10 quantiAGREMI has received funding from the European Partnership on Metrology, co-financed from the European Union's Horizon Europe Research and Innovation Programme and by the Participating States.

Intercomparison of generators

Conclusions

Traceable data structure
